AND MORE!

QEP® Xtreme™ 5/64" (2mm) Diamond Grit Grout Removal Blades are specially designed with an open anchor for universal compatibility with most non-starlock tools. Manufactured for best-in-class performance using high-grade diamonds for exceptional heat and fracture resistance and a unique bonding process for superior diamond retention. The blades have a 5/64" (2mm) kerf for flush cuts and round edge work without over-cutting, delivering precision cuts every time. Lasts 12X longer than standard carbide grit blades. Universal interface fits most oscillating tools.
