PRODUCT INFO

The QEP® Euro Notch Cork Handle XL Stainless Steel Trowel has been manufactured to the highest standard with the professional installer in mind. The unique alternating notch pattern provides a more consistent mortar bed by reducing mortar voids and the need to back butter tile. The notches create a zipper effect closing between the sub-floor, thinset and the tile preventing air pockets to complete the bond. Ideal for large format tiles. This premium-grade trowel has a unique cork comfort grip handle engineered for a better cushion, anti-slip grip. Features a tempered stainless steel blade for an extended life and a heavy duty aluminum shank.

*25% longer blade life, Proven by 3rd party independent testing.
