HOLDING POWER*

MAKES HEAVY LIFTING EASY

The QEP® 8" Vacuum Pump with Suction Cup makes heavy lifting easy. This hand held portable suction cup has a holding power of 242 lbs. It can be used to lift large tiles, stone, glass and all types of non-porous building material. To use, pump plunger until red line disappears and suction is engaged. During use, red line should not be not visible. Release valve is located on opposite end of plunger. Store with protector cover (included) in durable carrying case.

*When used on a clean, smooth, non-porous surface
