PRODUCT INFO

Designed for quick installation, the LASH<sup>®</sup> Tile Leveling System reduces costly call backs by ensuring that the finished floor surface is lippage-free. It is the perfect system to use with large-format rectified porcelain, thin porcelain tile, marble and stone where narrow grout joints are required. This fast, simple system is the most cost effective installation method on the market to eliminate lippage.

The LASH System provides narrow 1/16" or 1/8" grout lines. For grout joints up to 1/4", traditional spacers can be used.
