

Tile Leveling System for Tiles Up to 3/4" Thick
Used by professional and DIY installers to save time and obtain leveled and consistently spaced tile.

Two-Part System Eliminates Uneven Tile
Designed to work to level, align, space, and hold large format porcelain, marble, and stone tile.

Part 1: Stems
Stems available in 3 formats to work with any tile layout.

Part 2: Caps
Reusable caps can be used with the in-line stems, the 3-corner stems and the 4-corner stems.

Tile Leveling Caps Used on All the Stems
Hold tile at an even height for lippage-free results, while providing visibility of joints.

Tile Leveling In-line Stems
Special design ensures even spacing when installing tile in-line, producing even 1/16" grout lines.

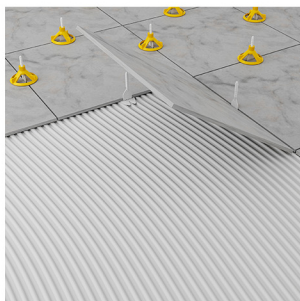

Tile Leveling 3-Corner Stems
Cross design ensures even spacing where three tiles come together.

Tile Leveling 4-Corner Stems
Use where four tiles come together, placing at the corners.

For Faster Tile Installation With Professional Results
Easy to use without any tools.

1. Insert Stem

2. Secure Spinning Cap

3. Remove After Drying
